

ShrinkTwist

Semi-automatic shrink machine with rotating arm

**Technical details:**

Optical control of the security frame
Unlimited palett weight
Palett sizes up to 1200 x 1000 mm
Maximum palett height 2000 mm (Standard)
Optical palett height detection
electronic control unit
Height of the rotating arm 3400 mm
Foil thickness: 70 – 200 μ
Gas type: all kind of gas
Proved Shrink machine with permanent
electric stress ignition (according to DVGW
and BG)

Special options are possible

Options:

- available with electric heaters
- option with double-arm
- conveyor technology

...and much more

Advantages:

- individual shrinking of commissionized goods
- perfect foil undershrink
- flexible top and undershrink time
- flexible operation programs
- moveable undershrink beams for different palett sizes
- approved electrical burner
- integrable in conveyor technology

Security:

- Gas control
- Flame control
- Rotation control
- Collission protection
